I am Ms Ban KG1A teacher. We had a great year experimenting and investigating the world around us.
Our Favourite time was library time, that’s why we believed that the more we read the more things we will discover.
In our school year we built and created many projects such as a recyclable castle, we designed, and created our class castle with our own hands. Many activities helped us learn from each other and halos increased our social and interaction skills English successfully as a class. I am extremely proud of KG1A and wish them all the best for KG2.
I am Ms. Irene, I had a great time with KG1-B this school year. Our favorite time was learning through hands-on activities, we were able to explore our senses and numerical skills by counting and sorting. Our social skills improved by learning to take turns, sharing material, saying and doing kind things. We had great enjoyment throughout the year using real life experimental projects to encourage our imaginative growth.
In KG1 C this year we had a lot of fun adventures. We learned new things and made new friends. Mrs Kelly helped us reach our potential and prepared us for another great year next year. It was a wonderful and fun filled year with lots of great activities and new ways to look at the world.
I, Miss Emma, enjoyed supporting KG1D’s development through activities that helped them recognize the concept of both matching and sorting. The students worked happily together and enjoyed working as a group to enhance their communication, fine motor, thinking, decision-making, concentration and interaction skills. These hands-on activities are crucial in KG as they promote creativity and allow flexibility in learning. I was thrilled that KG1D were keen to explore new ways of learning throughout the year.
I am Ms. Zainab I was very happy to be teaching KG1E this year.

I created a rich environment in which children are free to explore the joys of learning, and we worked happily together as a group to enhance our communication, fine motor, thinking, decision-making, and concentration and interaction skills.

We had peaceful atmosphere that motivated my students to become life-long learners.

Regards,

Zainab 😊
I am Ms. Salam and I was very happy to teach and watch KG1F learn and grow. Our class really enjoyed many experiments and projects, which encouraged our curiosity to grow. Throughout our school year we were all actively involved in our learning process and learned best through hands-on activities and movement. In this classroom we do second chances we apologize we forgive we respect each other we keep our promises we never give up we encourage one another we laugh often we belong… We are Family
I am Ms. Yasmine KG2A class teacher. I do have fun teaching. I am so blessed to be in a school that supports the importance of play at this age. When children are engaged with centers & toys they are “NOT just playing” they are building social skills, taking turns, learning how to have conversation, learning real life skill & application etc………………
KG2-C is never a quiet place, where rote learning is implemented. My classroom is a place where students are asked to socialize with their peers all on a quest for knowledge, where they are actively taking part in subject matter, and where all learning styles are being catered to applying the 21st century strategies and methods.

Best Regard;
Natalie Kolozian
I’m Ms. Iris KG2D class teacher. In my class the students learn how to navigate this world around them, their social skills develop & at the end of the year they are ready to move forward with all what they learnt.
I am Mrs. Debbie and I was very happy to teach and watch KG2E learn and grow.
We are doing a hands-on science activity about sinking and floating. This really got us thinking, this was a great opportunity to use our English communication skills. Our class really enjoyed many experiments and projects, which encouraged our curiosity to grow.
Throughout our school year we were all actively involved in our learning process and learned best through hands on activities and movement.
This year KG2F traveled with Miss Dima to the adventure planet. We did a lot of science projects and hands-on activities. We used our imagination to travel through our creative world. We enjoyed all the love, laughter, and fun times.
